Strathmore, Alberta, September 21st 1927

Subscription per Annum, \$2.00, Foreign \$2.50

REGULAR MEETING OF TOWN COUNCIL

Tuesday evening was regular Council meeting night, and Acting Mayor Sanders presided with the Council in Old Town, in the absence of Mayor Shrimpton.

Councillors Bailey, Miller, Quinn, Schuler and Hudson were present.

The minutes of previous meeting read and confirmed.

Secretary-Treasurer Weers reported on the Tax Sale and how long it had been advertised, but no bids had been received for the properties at the sale. Since the day of the sale, W. Sprague had made a proposition to buy six lots near his home at \$1 each, and the Council decided that it would be wise to accept the offer and get the lots back on the tax roll.

Letters of appreciation were received from Esauwag Lanthorn and E. S. Stuckert, acknowledging the honor done to them in naming the Park and Highway.

Councillor Schuler was quite proud of the Council and himself in particular, as he brought to the attention of the worthy legislators that possibly a grand jury from some province would be reading Mr. Lanthorn's eulogistic letter, and they would recognize that the Strathmore Council of 1927 had a first class and every member at the board acquired without a quiver in the worthy Council's conclusion.

The letters were ordered filed without a dissenting voice.

The Council decided to spend about \$40 or \$50 on the road near Mr. Bluck's residence, repair sidewalk in the vicinity of Alex Gray's home on 2nd avenue; build a new culvert on 2nd avenue, in the rear of Hulse's Machine Shop and place a culvert on 10th way avenue at sixth street.

The matter of preparing a new by-law in regard to parking of automobiles and reckless driving was quite fully discussed, but it was thought advisable to get further information in order that in the new by-law the "speed artist" should be left without a loophole to escape the proper penalty in case of conviction. Many cases were cited of people cutting the corner at the silent policeman, which carries with it very great risk of serious consequences.

The Minister of Public Works and his committee were instructed to make use of the lots 11, 12 and 13 in block 2, to provide suitable accommodation for farmers to tie up their teams, the lack of which has been a great inconvenience.

The matter of the carelessness of many people in creating fire risk through negligence was informally discussed, and it was pointed out that the Fire Commissioner of the Province has full and complete power to prosecute anyone who causes a fire through carelessness, and that he is very much disposed, in the interest of the town as a whole, to make an example of anyone who is an offender. It may not be generally known, but the Chief of the Fire Brigade is required to make a report to the Commissioner upon each fire that requires the services of the brigade, and after the report has been received by the Commissioner, action is taken at his disposal.

It was decided to not make any further payments to John Cleve on the contract until the condition of the contract are more fully completed.

A number of current accounts were referred to Finance Committee for payment.

No further business was presented, and Acting Mayor Sanders, flanked as he was by the Council, declared the meeting closed.

WINTER WHEAT FORTY BUSHELS TO THE ACRE
LETHBRIDGE, ALTA.—(By telegraph.) Wheat of Mill River is sending winter wheat to the grain elevator grading number 2 and averaging 40 bushels to the acre.

I Saw Last Week

"MAT" BARBER telling the people that he took Leslie West and Jim Barrett out shooting and that he discovered a wolf, and dispatched him with the first shot, although for safety he packed in six more shots without even taking aim. Neither Leslie or Jim have given their side of the story yet. A GOOD FELLOW waiting to say on Thursday afternoon for two days young boys, on Saturday night. Tough luck old man. MARSHALL TIERNEY explaining to his right lawyer, Aron Chase, the technical terms of complaint and conviction, and still Aron seemed to retain complete control. BILL THORNTON mounted on a white charger at Chamberlain's farm, looking the part of a regular "king bird." CHIEF A. V. McFARLAND visiting the Mayor and Town Council would provide an Electric sign. D. M. LINDY trying to locate a phone call that failed to leave the number, its content intense. PERRY PARISH expressing himself very forcibly upon the new coal rate.

The company is showing interest at the rate of 6 per cent, per annum on the subscription until the stock is completely paid up. All the shares of the company and its wholly owned subsidiaries, such as Quebec Central Railway Company, are eligible to subscribe for the new stock.

The success which has attended all previous shows and sales gives the Directors confidence in suggesting that the amount of stock to this year's event will find a splendid market for their feeder steers.

While the recent order of the Dominion railway board lowering the grain export rate from Calgary to Vancouver to 20 cents conferred new advantages on the province, inequality of treatment still existed. Mr. McGeer conceded, and he insisted the sale of 18 cents established on the haul to Quebec.

Dr. H. N. Savage and his wife visited Mr. and Mrs. Stuckert on Friday and Saturday.

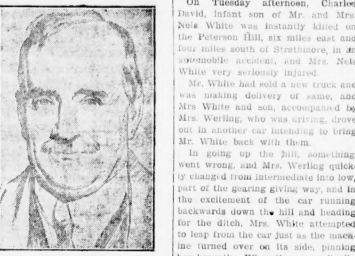

The message is a convincing argument, couched with "The Research Service Incorporated," of Washington, D.C.

Dr. H. N. Savage was here two years ago and addressed the irrigation act on his trip around the world, referring to the progress of irrigation in Egypt, the Sudan, Mesopotamia, India, etc. He also addressed the Engineering Institute of Canada, Calgary Branch.

Dr. Savage is now touring the north-west by automobile, and investigating various irrigation projects, and general conditions.

Since his former visit, Dr. Savage has been over South America and the West Indies, reporting on power development and municipal utilities. Dr. Savage was in the company with the splendid grain crops being harvested in our district, and is driving west via Buffalo, Lake Louise, Nelson, and the Okanagan.

INSTANTLY KILLED EAST OF STRATHMORE

The French Ambassador, who is negotiating with the United States for a commercial treaty between the two nations. At present there is no commercial treaty between the two powers, and it is expected that the negotiations will be successful, exporters from both countries will reap many benefits.

The volume of business today is good, but competition is so severe and efficiency so low that profits are being squeezed commonly.

Following Conservative George, very small Statistics indicate that this small Statistics will extend into 1928. We cannot expect a point as long as money continues weak; nor can we expect better times so long as commodity prices continue to decline.

For the above reasons, I am advising clients to take a conservative position both in business and investments. The immediate outlook for business as shown above, is moderately good.

We are in a period when we manufacturers, merchants and investors will be wise to store up their resources. If enough men will do this, normal conditions could continue and such readjustment as is necessary could be so spread out over a long period as to do no one any harm.

TEACHER HAS THE AUTHORITY

Conviction of W. H. Macleod, principal of the Prince Arthur school, Moosejaw, found guilty in police court of assaulting Mona Stody, 15-year-old pupil, was quashed by Judge Cassidy, who allowed costs for the application, both in appeal and city police court, were quashed on technical grounds.

Judge Outler held that Mr. Macleod had the authority to inflict corporal punishment, and in this particular instance the punishment inflicted on Mona Stody was not excessive.

ONTARIO IMPORTING KENTUCKY TOBACCO WORKERS

OTTAWA, Ont.—Two hundred workers from Kentucky will be placed on tobacco farms on St. Anne Island, near Chatham, Ontario, according to the Ontario Government Information Bureau. This action will be the direct result of the action which has attended the experience this year on the Island by experienced tobacco growers from the Madisonville district of Kentucky. Some hundred and fifty acres on the Island were placed under tobacco this year and next year it is expected that 1,000 acres will be planted with various kinds of tobacco.

TORIES OF BOW RIVER APPOINT WINNIEPEG DELEGATES

Notwithstanding the bad state of country roads owing to the recent rain, a thoroughly representative gathering of Conservatives of the Bow River Conservatives of the Bow River constituency met in convention on Thursday afternoon and elected delegates and alternates to the forthcoming Dominion convention at Winnipeg on October 10.

The delegates appointed were: A. C. Strickland, Irwin; Mrs. H. Nelson, Vulcan; W. R. Sanderson, Drumheller; H. Nelson, Vulcan; and R. L. McMurtry, Drumheller. The delegates mentioned were elected by acclamation. The alternates were: W. W. Granger, Granger; W. McDonald, (Gleichen); W. McLava, Bassano; P. C. Meyer, Drumheller; and Perry Holland, Irwin.

Bennett Speaks

In addressing the gathering Hon. H. B. Bennett, K.C., M.P., stressed the fact that the Conservatives would not in any way constitute themselves into a holiday party or a wild orgy of night sessions, but would probably be in the hardest work, the delegates could do in a period of two or three days, and the extent to which they devoted themselves to the work they were the interests of their country.

Mr. Bennett spoke briefly after outlining the arrangements made for the next office of the Conservative Party. There was a vast difference, he said, between a prospectus and a record. Conservatives say that with pride whether they win in power or not.

Talks of Record

The truth was that all the constructive legislation that had made Canada what it was through legislation enacted by the Conservative government, had been effected by its predecessor in office. Sir Charles Tupper's views on that point, he said, were vindicated before he died.

The speaker said that the Winnipeg gathering promised to be the most representative convention in the history of the Conservative party, and enthusiasm was growing greatly as its date approached. Among its delegates would be the leaders in industry, in the professions, and in every walk of life.

—Calgary Herald

BABSON THE GREAT STATISTICIAN ADVISES CAUTION

WELLESLEY MILLS, Mass.—The book for business is good said Babson Babson to the delegates of the fourteenth annual National Business Conference at its opening session at Babson Park. He strongly advised conservation both in business and in investments during next year, drawing his conclusion from the trends of the business factor now.

The Babson Statistical Organization, which makes a study of business and economic conditions, has invited experts to discuss financial and industrial problems affecting individual concerns, such as sales policies, inventory, and other business conditions.

Mr. Babson said, in part:

A condition exists in the business world today that has never before existed since statistics on business conditions have been available. I refer to the fact that we are in a period of declining commodity prices, which heretofore has never been followed by good times. That is, economic history shows, that has always followed increased commodity prices to bring on prosperity, and that the two factors have never before existed simultaneously. Yet today we find the apparent paradox of low interest rates and declining commodity prices.

The reason for this unusual situation is that there is today in the United States an excess of manufacturing capacity, which is the cause of the present severe competition. There is an

excess of copper, lumber, oil, coal, rubber and other raw materials which is upsetting commodity markets.

The volume of business today is good, but competition is so severe and efficiency so low that profits are being squeezed commonly.

Following Conservative George, very small Statistics indicate that this small Statistics will extend into 1928. We cannot expect a point as long as money continues weak; nor can we expect better times so long as commodity prices continue to decline.

For the above reasons, I am advising clients to take a conservative position both in business and investments. The immediate outlook for business as shown above, is moderately good.

We are in a period when we manufacturers, merchants and investors will be wise to store up their resources. If enough men will do this, normal conditions could continue and such readjustment as is necessary could be so spread out over a long period as to do no one any harm.

TEACHER HAS THE AUTHORITY

Conviction of W. H. Macleod, principal of the Prince Arthur school, Moosejaw, found guilty in police court of assaulting Mona Stody, 15-year-old pupil, was quashed by Judge Cassidy, who allowed costs for the application, both in appeal and city police court, were quashed on technical grounds.

Judge Outler held that Mr. Macleod had the authority to inflict corporal punishment, and in this particular instance the punishment inflicted on Mona Stody was not excessive.

ONTARIO IMPORTING KENTUCKY TOBACCO WORKERS

OTTAWA, Ont.—Two hundred workers from Kentucky will be placed on tobacco farms on St. Anne Island, near Chatham, Ontario, according to the Ontario Government Information Bureau. This action will be the direct result of the action which has attended the experience this year on the Island by experienced tobacco growers from the Madisonville district of Kentucky. Some hundred and fifty acres on the Island were placed under tobacco this year and next year it is expected that 1,000 acres will be planted with various kinds of tobacco.

MEGER URGES B. C. TO CARRY FREIGHTS FIGHT TO OTTAWA

VANCOUVER, B.C.—British Columbia will carry its freight rates fight to the supreme court of Canada, or to the governor-general-in-council, the advice of G. McGeer, K.C., provincial government freight rates counsel, is accepted by the administration.

That he had advised Premier McLean to continue the fight before one of these bodies was indicated by Mr. McGeer.

While the recent order of the Dominion railway board lowering the grain export rate from Calgary to Vancouver to 20 cents conferred new advantages on the province, inequality of treatment still existed. Mr. McGeer conceded, and he insisted the sale of 18 cents established on the haul to Quebec.

DR. H. N. SAVAGE AN INTERESTED VISITOR HERE

Dr. H. N. Savage and his wife visited Mr. and Mrs. Stuckert on Friday and Saturday.

The message is a convincing argument, couched with "The Research Service Incorporated," of Washington, D.C.

Dr. Savage was here two years ago and addressed the irrigation act on his trip around the world, referring to the progress of irrigation in Egypt, the Sudan, Mesopotamia, India, etc. He also addressed the Engineering Institute of Canada, Calgary Branch.

NEW CANADIAN AIR LEAGUE

A new Air League has been formed in Canadian aviation, similar in scope and function to the Air League of the British Empire, and Colonel V. H. Muter, one of Canada's foremost aviators, has been appointed on the Provisional Council, and is the chief representative of Western Canada.

EMPLOYEES WILL BUY 50,000 C.P.R. SHARES

MONTREAL.—The Canadian Pacific Railway is making a stock offering of 50,000 shares at \$15 per share to its employees. The employees of the railway, may subscribe for one share for \$200 or 10% annual rate of \$20. Payment for the new stock will be made in monthly instalments of not less than \$5 share and not more than \$15 a share.

The success which has attended all previous shows and sales gives the Directors confidence in suggesting that the amount of stock to this year's event will find a splendid market for their feeder steers.

STOCKER-FEEDER SHOW AT CALGARY

The fifth annual Alberta Stocker and Feeder Show will be held on October 17th next followed by an auction sale on the 18th, of all entries.

The success which has attended all previous shows and sales gives the Directors confidence in suggesting that the amount of stock to this year's event will find a splendid market for their feeder steers.

Price money, to the extent of \$5,000.00 will be offered for carload and group classes of the best beef of cattle of all ages up to three years; also for carload and group classes of the best beef of cattle of all ages up to three years; also for carload and group classes of calves, either male or female, or mixed, all on trial except calves must be deboned.

Food conditions are excellent, and, no doubt there will be a satisfactory demand for feeder cattle this fall. Any commission firm at the yards, or the manager, will be glad to answer all inquiries for further information.

NAMAKA FARM MAY PAY OFF FIFTY THOUSAND

WINNIPEG, Man.—On his return from an inspection tour of the settlement made by the Canada Colonization Association in the west, R. C. Duncan, assistant manager, brings a good account of conditions of the new settlers. Prospects in Alberta, he says, are particularly bright. One the Geo. Lane farm at Namaka, 15,000 acres, owned under the auspices of the association, by 26 families, the settlers expect to pay off \$50,000 of their indebtedness in the near future. The settlement made by the association in the Lethbridge district are so successful that it has been decided to increase from 25 families this fall.

House of Hobberlin

SPECIAL REPRESENTATIVE

Mr. R. W. Palmer

Of Toronto, will be at our store all day

Saturday
SEPTEMBER 24

With a fine range of samples and models for

SUITS AND OVERCOATS

FOR FALL AND WINTER, 1928.

PRICES FROM \$28.00 UP.

Specially featuring a \$35.00 and \$50.00 range of Suits—the best values ever offered by this up-to-the-minute tailoring establishment—at our store next Saturday, September 24th.

Thos. E. Wright

"MEN'S BETTER WEAR"

Fall Brings a
New Black
Frock

It's so much harder to enter Europe without a passport than it is to get through fall and winter without a new craze or satin frock. No matter what your daily program is, you will surely and constantly need a simple smart costume of the type generally known as "Fash afternoon dress." The frock shown at the left gives the right an easy balance, and novel pointed cuffs set off the long straight sleeves. (Copyright, 1927, by Bazaar.)

CATENY'S DEPT. STORE

GERMANY PAYS IN GOLD
FULL AMOUNT DUE FOR
REPARATIONS AND OCCUPATION

BERLIN—With the payment of 55,000,000 gold marks, Germany met her reparations annuity of 1,500,000,000 marks, provided for in the latest plan, under the Dawes plan, it is stated in a communiqué issued by S. Packer Ober, agent-general for reparations payments.

"Germany thus fully and punctually has made all the payments laid down during the third year of the plan," the communiqué states: "For total payments to creditors for the three years during which the plan now has been operating, total 3,750,000,000

KANSAS CITY—Satisfied that her

son Jack Dempsey, is "getting along all right" at Chicago Mrs. Celia Dempsey today apparently was chiefly concerned about securing a ringside seat from which to watch him fight Gene Tunney.

"It will be the first championship fight I have seen my boy appear in," she said.

HAS LOST EIGHT
LOVERS BY DEATH

LONDON—Miss Mavis Bagley, a fashionable woman, who has just returned from India, where she has been employed on the army teaching staff, claims to be more unlucky in love than anyone else.

Five days before the date fixed for her wedding the war broke out, her fiancé enlisted and was killed in the Mons retreat.

A year later Miss Bagley became engaged to her late fiancé's brother. It was agreed they should marry on his next leave, but the day before he was due to go on leave he was killed in the trenches.

In 1917 Miss Bagley met an officer of the Buffs to whom she became engaged. Within two days of the engagement, however, he too was killed, in a few days of the date fixed for the wedding was killed in a motor accident on the Dardanelles.

Two years later Miss Bagley, who is today on an official of the Indian Civil Service to whom she became engaged. Early the following year he was killed by a bullet.

For the second time Miss Bagley became engaged in 1924, but her fiancé, too, was killed in a motor accident, the anniversary of which he was killed during the Indian Army campaign.

Last year Miss Bagley became engaged for the eighth time and was travelling with her fiancé to Ravello in Italy when he was killed on the way.

Miss Bagley has now given up all idea of married happiness.

"During the year completed Germany received credit for deliveries of kind valued at 617,000,000 marks. The cost to her of maintaining the Rhine land occupation forces for the past year amounted to 74,000,000 marks.

SPORT NOTES

TUNNEY-DEMPSY REFEREE

YANKES WILL PROBABLY
ESTABLISH NEW RECORD

CHICAGO—Tex Rickard has selected the referee for the coming Tunney-Dempsey fight at Soldier Field on September 22. The third man in the ring will be Ed Purdy.

Application for a license for Purdy; there is little doubt that Rickard's personal selection will be granted papers.

Dempsey and Tunney have been informed that Purdy is to handle the bout. They seem perfectly satisfied with the selection of Rickard. It is not probable that the boxing commission will know that Purdy is to be the referee until he files his application.

BUCKING "TIGER" PROVES
COSTLY TO GREEK

CHICAGO—"Nick the Greek," probably the best known gambler in the country, has demonstrated that he can pull up stakes and take in the casinos he is a big loser. Last week he dropped \$20,000 in less than thirty minutes, settled in cash and walked out of the place in good humor.

"I had a hunch that I was not my night to win," said "The Greek" in explaining his sudden decision to quit playing. "Jack was running against me and I decided that I would postpone playing until some other evening."

When "Nick the Greek" started to settle he pulled forth a bankroll large enough to trip an elephant. It is claimed that he had nearly \$200,000 in cash with him.

"Guess I'll save what's left to bet on the big fight," was his parting comment, and he went away with a few intimate friends.

It is known in sporting circles that "Nick the Greek" desires to wager \$25,000 on Jack Dempsey to beat Tunney in the event that he can secure odds of 7 to 5 or better.

RUTH MAY BREAK RECORD

With Ruth so near to breaking his home run record of 59 in a season, it would take only one more such feat to make him the leader in the league. He hit five home runs in three games in Boston, and he is now from the record. Apparently all he needs now to start him off again is to have Gehrig hit one or two and threaten his lead again. There is no doubt but what Gehrig is hitting hard. Ruth an incentive and his rival should take a good measure of the credit it Ruth owes his record.

"MONEYVITS" STOPPED
CHICAGO NATIONALS

CHICAGO—Moneyvits—the cause of many evils in the world—is now given the credit for causing the downfall of the Chicago Cubs. When they had the National League pennant, they were in their grasp and it is now considered doubtful if they will attain the feat.

While the baseball boys have been groping around trying to find the cause for the debacle, they have failed to land on the correct reason because they did not know at a little incident that occurred recently in a coin confidence.

It is understood William Wrigley, owner of the club, offered to distribute the Club's share of the world's series to the players if they won the National League pennant. The club did not need the money as the season's receipts will be nearly a million and a half. Mr. Wrigley believes that money speaks a language all its own.

It is evidenced by his dealings with all his employees and it is said he believed the incentive of his added money would entice his players to greater efforts. And so it did, but the club officials figured.

Each club's share of the world's series money last year was around \$50,000. Divided among 27 ball players each would receive about \$2,000. With approximately the same amount their regular salary, the Cubs stood to pull down \$2,000 extra for winning the pennant.

With this pot of gold for a few before them, the Club players went on one side and sold the pennant.

The nervous tension proved too great, their anxiety to win became their undoing and second division took them with nothing at stake but to finish the season untroubled by anything that might occur proceeded to play a steady brand of ball and wiped up with the Cubs. As a result, the Chicago team dropped, lost its morale and now finds itself feeling a losing battle.

NEW YORK—The New York

American League Baseball Club can maintain its present margin of 17 games over the second-place Philadelphia Athletics right up to the close of the season, it will break its own record, made in 1923, of finishing 10 games in front of the runner-up.

In 1923 the Yankees won 98 games and lost 54 and were 16 games ahead of Detroit, next in order. Today the Yankees have won 96 games and lost 9, and stand a fine chance of being the first American League team to finish the season with an average of games won and lost more than 700.

Already the Yankees have established a home run record for a club in one season. They did this yesterday, when Ruth hit his fifty-fourth home run of the season to give him a club total of 145 for the season a mark that betters that of Ty Cobb made by the Chicago National League team.

The Yankees hit 121 in 1921, the year that Ruth established his record of 59 in a season, an average of one home run every day and 17 more games to play.

THE NATIONAL RACE
WONDERFUL COMPETITION

CHICAGO—All four first division clubs seem to be setting the picking at this period of the race. New York staff is the most uncertain of the four; it is a shoo-in to win about St. Louis and Pittsburgh having brilliant picking right up to the close of the season. Chicago's picking is also uncertain although it is apparently more stable than the Giants, Root, Blake, Bial and Carlson look stronger than Pittsburgh, Grimes, Benton and Barnes. But Meadows, Kruger, Hill and Aldridge and Sherdel, Hill, Alexander and Haines are difficult to judge.

At the present time the record of the five of the National League leaders may say the balance of power to that club although the Cardinals can also claim a powerful offensive. Seizing leave four clubs contested for a league pennant with such evenly balanced pitching and hitting departments.

FAULKNER GOES
TO THE N.Y. GIANTS

"Long Jim" Faulkner, Toronto southpaw, sold to the New York National League club, joined the staff of the Chicago Cubs and won his first game. Manager McDevitt sent a hurry-up call to Toronto requesting that Faulkner be sent to the Windy City for the opening of the series with the Cubs. When the pitcher was purchased there appeared to be nothing more than an outside chance of the Cubs getting into the race, but their remarkable dash to within one game of the leading Pirates has changed the complexion of affairs, and McDevitt is summoning all his strength to his command for the battle to the wire.

THE MARKET EXAMINER has a splendid story at the success G. S. Noble, of Noholfer, has had with winter wheat, as follows:

An average of 66 bushels 51 lbs. per acre was harvested at Noholfer, who was thrashed from a 24-acre field on the C. S. Noble farm at Noholfer. This with backwashes and other clean result to be made, will make the yield well over 57 bushels per acre.

The field is a portion of the 1000 acres that made a world's spring wheat record in October, 1916, the yield on this particular section at that time being over 52 bushels per acre, the lowest on the 1000 acres.

Mr. Noble has 1500 acres of this excellent variety of winter wheat, all of which, it is believed, will be in the world's record class. The field on which the test was made was carefully measured and found to contain 24,328 acres and was found to be situated at the Alberta Pacific water at Noholfer, the total yield for the field being 19,351 bushels after deducting the loss from shelling.

The crop was raised on land that had been carefully summerfallowed last year by discing and chiseling August 1 and 29 by the furrow method followed in Montana. Harvesting was done with a combine.

Mr. Noble used only 25 lb. of seed per acre but believes that this should be increased, possibly for crops that are as much mature as has been prevalent in the present season, and which are harvested by the combine method. The heavier seedling would result in a heavier, sturdier straw and head with a lighter load for the combine and yet a larger yield and less tendency to shed in heavy winds. This year he is seeding at 9 in. spacing instead of 12 in. This will allow the fall wheat to cover the ground more quickly, thus preventing drying.

Mr. Noble is convinced that winter wheat is one of the very best methods of preventing soil drifting. Mr. Noble has sown 1250 acres of winter wheat this year and has sold several thousand bushels of his Kinross, M.C. 22 wheat, which has been seeded.

The first carload of winter wheat to pass through Calgary this season was shipped by Mr. Noble to Aldridge for seed purposes.

The drill is a 14-ft. wide wheel type equipped with lower set wheels on ordinary low drill except that 2½ inches above the point there are small wheels welded to the sides of the low to make the furrows. Strong pressure springs are used and the furrows, which are spaced 12 inches, are left four inches deep with the seed deep in the firm, moist ground and only covered about two inches.

The packers are made of disc blades in pairs on each square shaft and held an inch apart crown side out 12 inches from centre to centre, and held in this position by the use of one pipe cut to fit and the necessary two disc roller bearings for each 7 ft. section. These packers are very deep in the soil, and with rows with light draft and the wheat is seen in the rows in from four to six days after seeding.

Winter Wheat Yields
Fifty-Seven Bushels

The Market Examiner has a splendid story at the success G. S. Noble, of Noholfer, has had with winter wheat, as follows:

An average of 66 bushels 51 lbs. per acre was harvested at Noholfer, who was thrashed from a 24-acre field on the C. S. Noble farm at Noholfer. This with backwashes and other clean result to be made, will make the yield well over 57 bushels per acre.

The field is a portion of the 1000 acres that made a world's spring wheat record in October, 1916, the yield on this particular section at that time being over 52 bushels per acre, the lowest on the 1000 acres.

Mr. Noble has 1500 acres of this excellent variety of winter wheat, all of which, it is believed, will be in the world's record class. The field on which the test was made was carefully measured and found to contain 24,328 acres and was found to be situated at the Alberta Pacific water at Noholfer, the total yield for the field being 19,351 bushels after deducting the loss from shelling.

The crop was raised on land that had been carefully summerfallowed last year by discing and chiseling August 1 and 29 by the furrow method followed in Montana. Harvesting was done with a combine.

Mr. Noble used only 25 lb. of seed per acre but believes that this should be increased, possibly for crops that are as much mature as has been prevalent in the present season, and which are harvested by the combine method. The heavier seedling would result in a heavier, sturdier straw and head with a lighter load for the combine and yet a larger yield and less tendency to shed in heavy winds. This year he is seeding at 9 in. spacing instead of 12 in. This will allow the fall wheat to cover the ground more quickly, thus preventing drying.

Mr. Noble is convinced that winter wheat is one of the very best methods of preventing soil drifting. Mr. Noble has sown 1250 acres of winter wheat this year and has sold several thousand bushels of his Kinross, M.C. 22 wheat, which has been seeded.

The first carload of winter wheat to pass through Calgary this season was shipped by Mr. Noble to Aldridge for seed purposes.

The drill is a 14-ft. wide wheel type equipped with lower set wheels on ordinary low drill except that 2½ inches above the point there are small wheels welded to the sides of the low to make the furrows. Strong pressure springs are used and the furrows, which are spaced 12 inches, are left four inches deep with the seed deep in the firm, moist ground and only covered about two inches.

The packers are made of disc blades in pairs on each square shaft and held an inch apart crown side out 12 inches from centre to centre, and held in this position by the use of one pipe cut to fit and the necessary two disc roller bearings for each 7 ft. section. These packers are very deep in the soil, and with rows with light draft and the wheat is seen in the rows in from four to six days after seeding.

The furrows provide for deep seeding, but not covered too deep, help to hold snow, and the early cracking of the soil in spring takes place in the ridges and the wheat roots are not injured and much winter killing should be avoided.

"Where soil is apt to drift such seeding should be done early as more time is required for the fall growth to cover the ridges.

This year Mr. Noble is seeding with the furrows 9 inches from centre to centre.

VANCOUVER AND
EDMONTON NOT SATISFIED

Under the title "Everybody Wins But Vancouver," the Vancouver Sun criticizes the recent order of the Railway Commission with reference to grain rates. "It is," it says, "a victory for prairie farmers and for eastern ports, but, at best, it is only a partial victory for the shippers. It proves a serious blow to the Western Grain route, effecting, as it does, a cut of nearly 50 per cent. in the rates from Port William to the St. Lawrence and Atlantic ports that will enable the East to compete more successfully with the Western route."

"The order gives us a rate of 20 cents from Calgary and Edmonton to Vancouver. We are morally entitled to the same rate from Calgary, rate on whether or not the Canadian National follows with an 18-cent rate from Edmonton, is a matter for the C.N.R. to decide."

The Bulletin of Edmonton also objects to the fixing of mileage from Edmonton to Vancouver. It demands that the rate be fixed on the actual mileage from Calgary to Vancouver, 612 miles, which would compel the Canadian National to meet this rate from Edmonton to Vancouver. "It seems fairly probable," says the Bulletin, "that there will be a demand for an appeal, with a view to having this arbitrary mileage basis abolished."

On the face of it, if there is no just reason for a mountain differential in rates there is no better justification for calling 612 miles of mountain railway 765 miles, and thereby producing the same result to the shipper.

"But there is also the consideration that rates to Port William from the great area of the prairie provinces lying north of the main line of the C.P.R. are reduced by the order. The effect of that will be to cause more grain to flow eastward. British Columbia interests will therefore have as strong reason as Alberta farmers for wanting an appeal against the theoretical mileage by which rates from Alberta points to Vancouver may be kept two cents a hundred higher than the real mileage would allow."

This is Pat

PAT O'HOLEY HOME
— O —
Drops Off Harvest Excursion,
Still A Prophet.

There may be some days here who will turn up their nose at being doubtful, but just to name I foretell all about the 'big crop of 1927 no less than three years ago. I said it was 'domin' an 'omin' big. I don't do my prognosticating with aid of granite-cast, calipers, an' glass globes as Father says; naythor do I accept cash, but I know what I know, an' I saw what was ahead of us. Every time I was asked a batch of home brew—an' that was purty often—I could read the signs in the liquor for a series of wet years to be. And now there's here—fore of this, was other another in quick succession. By the time the lean years are here again every Old Faithful of the district will have money to burn—an' be burnin' it in suburban lawns than six cylinder cars. But let's name there's breakers ahead an' this is how I know it:

I was headin' west last wake for the harvest, an' I meets Old Man Riley in Winnipeg. He's feelin' purty gay an' crowsin' like a Loughor cockle.

"Hello Pat," sez he. "How'd ye git here? Where ye bin all these years, an' where ye goin'?"

"After I'd gone into detail about me travels in Rossiey, Orlend, Rhode Island, Oakesh an' Chicago, touchin' on the various vicissitudes which had kept me feet movin', he breaks th' glad news."

"Pat," sez he, catchin' me collar, "Did ye ever know th' folks of ut? They sht a whole of a crop in th' Cereel district! Th' wheat is standin' sixty full an' will make from sixty to sixty barrels to th' acre—barren frost, an' hail, an' wind, an' thieves, I have 700 acres of summerization an' 300 acres of stubble, an' ye cant tell me piece from both of 'em. If I trash a bushel this fall I'll have forty-thousand, weighin' 67 pounds to th' measure. Arrah, me tell! Here's last of old Willow Coohee? Now tell me, Pat, what th' devil am I goin' to do with so much money all at once?"

"Make a damn load of yerrel as usual," sez I.

"There was danger of me doin' that," sez Riley, scratchin' his head, "but not now."

"How's that?" sez I.

"Well, me creditors seem to have their doubts about me business ability, an' they have stepped an' kindly insinuated that they are lookin' after th' cash for reason. It's quite a nuisance to 'em, but they are not worryin'."

"While everything is cleared up, I'm goin' to buy me a Little, get a winter's grubstake, an' buy th' old lady two new dresses an' a coat. After that, we'll see."

"We will," sez I. "And what's more it's a blessing in disguise that ye have debts."

"How so?" sez Riley.

"Because," sez I, "there's more ways to get hurted than belin' kicked in th' stomach by a mule. Sudden riches is dangerous. Put yer feet on th' soft pedal an' go alay. Ye've had yer nose to th' grindstone for so many years that if I ye had to handle an' that money in me clunk, the chance to mine ye'd soon be in Ponce de Leon out paper dolls."

CEREAL RECORDER

ADVERTISING CONTINUES

TO PRODUCE

From London comes a good story, according to my way of thinking. It concerns an American actor who had injured his arm. He asked a policeman where he could find a doctor.

"Turn up Hind-court into Gough Square," said the bobby. "There is a doctor living there on the left hand side. I think his name is Johnson, but I'm not sure."

The actor followed the instructions and found the house. On a plate on the wall was the following inscription: "Dr. Samuel Johnson, author, lived here, 1769, died 1784."

HONEY PRODUCTION

14 MILLION POUNDS

OTTAWA—According to the Dominion Bureau of Statistics the estimated honey production of Canada in 1926 totalled 13,258,956 pounds, which at an average value of 14 cents per pound was worth a total of \$1,855,144. This compares with 12,512,376 pounds worth \$1,751,732 in 1925 and 15,239,343 pounds worth \$2,113,441 in 1924. In production last year Ontario had a substantial lead with an output of 5,000,000 pounds of honey worth \$700,000, followed by Manitoba with 3,252,212 pounds worth \$455,277. Quebec occupied third place with 3,252,000 pounds valued at \$455,280. The other Western provinces came next: British Columbia with 895,257 pounds worth \$125,315; Alberta with 215,000 pounds worth \$29,950; and Saskatchewan with 170,287 pounds worth \$23,840. New Brunswick's production amounted to 109,000 pounds worth \$15,260.

In Quebec there are now 776 beekeepers as compared with 6217 in 1921, while the number of colonies has risen in that time from 64,417 to 96,244. The total value of honey, honey and wax has in the five years grown from \$170,126 to \$2,062,191. Ontario does not produce complete statistics on its industry, but the 5,000,000 pounds production of 1926 compares with 10,000,000 pounds in 1925 and between 9,000,000 and 10,000,000 pounds in 1924. The most striking development in the past year was the rise of Manitoba to occupy second place in the production of honey. In 1925 and 1926 beekeepers in this province grew from 14,721 to 21,362, production from \$63,000 to \$735,212 pounds, and its value from \$273,104 to \$1,258,377.

DEVELOPING NEW WHEAT
Herman Trele, the Canadian wheat expert, is developing a wheat which will cause quite a stir in the grain-growing belts of both Canada and the United States. This new variety of wheat can be sown later and ripens eighteen days earlier than any present variety.

CANADA WILL SOON HAVE GREAT HIGHWAY

HALIFAX, N. S.—It now requires only the construction of 250 miles of highway before Canada will have a motor road extending from Halifax to Vancouver, entirely within the Dominion. This missing mileage is composed of one or two sections east of Winnipeg, and along the north shore of Lake Superior according to Dr. P. E. Doolittle, of Toronto, president of the Canadian Automobile Association, who was in Halifax recently.

Dr. Doolittle, as president of the association, makes practically an annual tour of the provinces from the Atlantic to the Pacific. He was present at the recent opening ceremonies of that section of the trans-Canadian highway that passes through the central part of British Columbia by way of Kicking Horse Pass. He described this part as the most spectacular section of highway in America.

It is now possible by use of an alternative route through southern British Columbia, to motor direct from Winnipeg to Vancouver, all in Canadian territory. Dr. Doolittle said, and he was looking forward to early completion of highways through those sections north of Lake Superior and east of Winnipeg that would link completely the East with the West in highway construction. As an instance of highway development in Canada of this nature Dr. Doolittle said that on night now motor from Montreal to Windsor, Ont., opposite Detroit, over a complete, permanently paved motor road.

WHEN SHALL PEOPLE BECOME REAL CANADIANS

OTTAWA—Efforts to bring to the attention of Canadian citizens the understanding of Canadian citizenship were recommended at a session of the annual conference of the Association of Canadian Clubs and the master was referred to the executive.

A further recommendation was also adopted to bring to the attention of the citizens the importance of putting the question regarding racial origin last on the census papers in future.

The resolution embracing these recommendations was brought before the conference by Mrs. Claude Nash, of Winnipeg, on behalf of the committee on resolutions and seconded by Mrs. Charles H. Thornburn, of Ottawa. The original recommendation came from the Canadian Club of Victoria, B.C. Mrs. Nash, in introducing the matter said she rather trembled at it and gave an instance of a Canadian citizen who, when approached by her had suggested that the matter of Canadian nationality and citizenship was one which might well be taken up by the Canadian Clubs.

Mrs. Nash said this citizen explained that this name had a German spelling and despite the fact that there were four generations of his forebears buried in a Canadian cemetery, he was still required by the census-takers to declare his racial origin as German.

FORD SPENDS \$22,000,000 ON PLANT EXPANSION

DETROIT—Henry Ford has spent \$22,000,000 the last 18 months in expanding his Fordson plant for a proposed production of 12,000 new Ford cars daily, according to the Detroit News. This plant, has been expanded more than 75 per cent since early in 1924.

Today at the Fordson plant there are 115,522 acres of land area enclosed by walls and under roof, compared with 4138 acres early in 1924. This expansion does not include the great area required for storing 312,000 tons of scrap steel produced from these operations.

Expansions include great open-hearth furnaces installed in a building 100 feet long and 240 feet wide. Four new furnaces began operations last year, three more are being rushed to completion for use within three weeks, and still another three will be added next spring, making 30 in all. A pressed steel plant 300 feet wide and 1250 feet long and brand new spring and upset building covering more than seven acres are other major additions.

REPORT MEIGHEN AS BACKING GUTHRIE

"Toronto Times," says the Toronto Star, "are interested in the report that Mr. Hon. Arthur Meighen, retired party leader, favors Hon. Hugh Guthrie, the present acting leader, for the permanent leadership and in using whatever influence he has to make sure of that gentleman's selection. Mr. Meighen himself, it is stated, will not be a candidate, though he will be asked to address the national convention at Winnipeg."

There is a growing conviction among Tories hereabouts that Hon. R. B. Bennett does not want the leadership. The proposed boom for him in Montreal is not reconcilable with reports that C. H. Cahen, M.P., has at least \$2 and possibly 50 per cent. of the 250 expected Quebec delegation votes pledged for Bennett."

CANADA IS VERITABLE PRECIOUS METAL ELSDORADO

MONTREAL, Que.—Sir Robert Horne ex-Chancellor of the Exchequer of Great Britain presiding at the second annual Mining and Metallurgical Congress here, spoke of Canada as an Eldorado in respect of its stores of precious metals, with over \$700,000,000 already invested. The output of metals has more than doubled since 1911 when production stood at \$102,221,000 as compared with last year's \$425,000,000. One result of the present meeting of mining men and their tour of the Dominion will likely be the getting up of an exhaustive report of the mineral resources of the

Empire, from which should arise various schemes of cooperation on the part of the different countries composing the commonwealth of nations.

DR. R. M. MARVIN
Economist of the Royal Bank of Canada, who in an address at the Annual National Business Conference at Babson Park, Mass., pointed out that trade between Canada and the United States was larger than that between any other two countries in the world. He is one of the latest members of Parliament from the West.

BENNETT TO FACE CHARGES

SAN FRANCISCO, Calif.—Jack Ben-

nett, alias Jacob Berman, was en route from San Francisco to Los Angeles today to face charges of misappropriating more than \$400,000 of the funds of the defunct Julian Petroleum company.

After being hunted for months throughout the world, Bennett called detectives from a San Francisco hotel late Friday and told them he was ready to give himself up.

In custody of officers, he was taken aboard a night train for Los Angeles, where he will be arraigned today before District Attorney Keys.

HUGHES PREDICTS COOLIDGE WILL BE RE-ELECTED

NEW YORK—Charles E. Hughes, who has just returned from a trip abroad, parried volleys of questions as to whether he would again seek the Republican nomination for President by saying: "I think President Coolidge will be re-nominated and re-elected."

QUEER WAGER MADE OVER DEMPSEY-TUNNEY BATTLE

OKLAHOMA CITY, Okla.—While Dempsey and Tunney show fans at each other in the coming heavy-weight championship fight two Oklahoma fans will avoid results with more than ordinary interest. For upon the outcome of the bout depends the fate of two betters, the loser to wheel the winner 410 miles to Kansas City in a wheel barrow.

WORLD FLIGHT ABANDONED
William Brock (top) and Edward Schlee (lower), of Detroit, who have abandoned their attempt to fly the world in record time. They had reached Tokyo, Japan, a distance of 12,275 miles, and had to cross the Pacific Ocean to complete the trip.

The New Goods are here and our large store is piled up from floor to ceiling

In anticipation of your requirements, we have the right goods at the right prices. Never before has this store had such a stock of merchandise bought from the best manufacturers. No need to bother sending away, buy where you can see the goods and know what you are getting. We had a customer in on Saturday who bought a Ford truck full, and they remarked that they wished our store was nearer to them, that the savings were real. We are out to build this business up to a much larger turnover, and we are doing it by selling reliable merchandise at the lowest possible prices. Do not judge on one price—give an order for ten or twelve items, and that will prove that our prices are right—the quality the best—and our service good. We want to serve you all the time, and the only way to do it is by giving you **VALUE, A LARGE ASSORTMENT AND SERVICE.**

FAREWELL SMOKER HELD

FOR "BOB" ANDERSON

Last Thursday evening about one hundred fellow business men and friends of H. B. Anderson, gathered in the Memorial Hall to give Bob a rousing send-off. Mayor Shrimpton guided the proceedings of the evening.

The evening was spent putting a regular smoker's supper, and listening to an excellent program participated in by the various talented artists of this community. Hon. H. Wright opened the program by singing his old favorite, and Messrs Martin Patrick, Percy Wright, Gatenby, Gullberg, and Vermaat also rendered songs or recitations.

At the request of the chairman, Messrs Wright, Gatenby, Garrett, and Fessenden spoke on behalf of the citizens, business men and citizens of the community, and in their remarks expressed the regret of everyone at the departure of a valued and highly esteemed resident of our town; relating in no few words the valuable service rendered by Mr. Anderson in every public cooperative undertaking, such as stampedes, parades, baseball clubs, etc. In his remarks, Mr. Fessenden brought forth many humorous happenings of the early days in which Bob had been connected, which caused much laughter, at Bob's expense, from those gathered around the tables.

The Chairman, Mayor Shrimpton, then presented Mr. Anderson with a wrist watch for Mr. Anderson, and a set of pipes for himself, on behalf of the many friends of the district. Mr. Anderson's reply was short, but gave his listeners the impression that he regretted leaving the town, and that if he did not like the east, he would soon return to Strathmore again.

The Elks Orchestra, who had been playing throughout the evening, struck up "For He's a Jolly Good Fellow" and everyone strayed their vocal cords in their endeavor to prove that they meant it.

About midnight the chairman brought the evening's farewell to a close with the singing of God Save the King and Auld Lang Syne.

Best for you and Baby too
Baby's Own Soap
To fragrance and refresh

"Tony" Grogan, the popular front, of Calgary, was in town on Monday. "Tony" is quite a mechanical genius, if you listen to the lot or he peddles in his spare moments. The latest claim he is now making is that he has invented a new type of automobile, and if the new working model is turned out by the mechanics according to his specifications and theories, it is bound to become popular especially with the lady motorists, in fact he THINKS it may revolutionize the motor industry. Of course "Tony" may wake up at any moment, or decide to change his latest brand of hop.

Carl Jones, of Huenar, son of Mr. and Mrs. E. F. Jones, of Strathmore, was taken to Bassano Hospital suffering from an attack of appendicitis, and successfully operated upon on Wednesday morning. On Wednesday evening he was reported getting along nicely, which his friends will be glad to learn.

BRANDON—MINNEAPOLIS ROAD TO BE 100 MILES SHORTER
BRANDON, Minn.—There are bright prospects that the Hudson route will be cut off the route from this city to Minneapolis next year. This will be through the completion of the route via the Turin Mountain reserve to Danforth, N.D., connected with one of the main trunk highways across the border.

: Local Jottings :—

Among the early duck hunters, the record of Mat Harbor stands out in a class by itself. In a locality near his residence there is a fine big slough, in which numerous ducks have been raising their broods all summer. For weeks Mat has been feeding them corn and rice, and on Thursday morning he was with a brood and with the first shot he bagged thirty. Just as he was reloading now he did it, in case Leslie West, and he reported the story. Leslie gave him one whiffing glass, a turned, much walked out, remarking to him, "I will tell that story a few times, and soon he will actually believe it, that what he does at the Gun Club."

Hello, is that the Call Office? Well I wish you would send a man up here to fix the meter. It won't run. Oh yes, Call. "Jack" Allen must be paying favorites, as all the meters he has installed in Strathmore are real speed meters, and run to form. He gets hours daily, result—building up a fortune for Bob Brown.

"Jim" Weir hopes the instructions regarding the age limit will be lifted before the Tennis Club Halloween dance is held. Jim wants to attend. In fact, if it is absolutely imperative that he should be among those present, cheer up, Jim, it will be O.K. by that date.

D. A. Perry has had a crew of painters at work, repainting the station buildings inside and out, making a very considerable improvement. Guess there is not much chance of getting any reduction in either freight or passenger rates this year.

The Bow River district so far has been free of the dreaded influenza pandemic. This condition, doubt being attributable to the early precautions exercised by the authorities, and the general application of the regulations by the patients. It is hoped that soon the danger from an out break shall have passed.

A. B. Broyles, special agent for the Hunsman Piano, is busy looking over this district, which has been allotted to him. Mr. Broyles is very optimistic about the business outlook for this season.

The Tonics Club held one of the most successful dances of the year last Fall, and have now made arrangements for another that will be a record breaker when they take on their big "Billboard's Dance."

"Bill" Thorburn, who was the guest of his brother during his vacation, was kept pretty busy while Clark, of Vulcan, by the Vulcan Elks. The local Elks will be quite interested as it was Mr. Clark who came to the rescue of Organizer McKinley, when the Calgary officers were compelled through their survival, to default helping with the installation of the local band.

Clark has returned from Vulcan to California.

A letter has been received by a friend from Dr. Zerkie, who is undergoing treatment at Poncha Hot Springs. Mr. Zerkie is feeling fine and regrets that he did not begin treatment two years ago. He says: "I wish Strathmore friends that I fully expect to regain my health within a short time."

A Past Exalted Ruler's Jewel was recently presented to Earl Clark, of Vulcan, by the Vulcan Elks. The local Elks will be quite interested as it was Mr. Clark who came to the rescue of Organizer McKinley, when the Calgary officers were compelled through their survival, to default helping with the installation of the local band.

Clark has returned from Vulcan to California.

R. W. Palmer, representative of the House of Hosiery clothes, will be in Strathmore at T. E. Wright's on Saturday, September 24th, with the latest in the latest styles, and the latest imported and domestic patterns, backed with their well known reputation for Quality tailoring.

A. D. Ashley met with a serious accident his town ran away and he has his hip broken. He has been removed to the hospital at Calgary.

Mr. and Mrs. F. O. Morris, formerly of Strathmore, are now living at Launalea California. Mr. Morris has bought a large grocery and meat store, and is conducting a very successful business.

Mrs. F. A. Cott met with quite a painful accident on Monday, when she slipped on the stairs, receiving a very bad fall, and injured her hip severely. Her many friends are hoping for an early recovery.

A team driven by Art Bruchart, owned by Dan Hisevich ran away and almost totally destroyed the binder which he was operating. Art says those horses are worse than gas engines to keep under control.

House thieving has become a popular pastime for some individual or individuals, and if plans do not materialize, the culprit will probably have the privilege of enjoying their Xmas season in the other Leithridge or Prince Albert prisons.

The local golf course is in fine condition, and anyone wishing to participate in the match next Friday are requested to notify on or before Friday the Captain, Jos. B. Van Tighem, or the Vice-captain, Billy Gray.

Mrs. Roberts, who has been the guest of her daughter, Mrs. G. H. Patrick, left yesterday for Vancouver, B.C.

Mr. and Mrs. W. H. Mitchell returned home after spending the past two weeks with Mr. and Mrs. Westergaard, of Estevan, near Edmonton.

Mrs. Ellen Way, who has spent the past year in New York, is renewing old acquaintances in Strathmore. Mrs. Way will spend the winter here.

Mr. and Mrs. J. E. Hunsman, of Calgary, were visitors in Strathmore Saturday afternoon. Mrs. Hunsman is representative of the Mutual Life Assn. Co., of Calgary.

A letter has been received by a friend from Dr. Zerkie, who is undergoing treatment at Poncha Hot Springs. Mr. Zerkie is feeling fine and regrets that he did not begin treatment two years ago. He says: "I wish Strathmore friends that I fully expect to regain my health within a short time."

A Past Exalted Ruler's Jewel was recently presented to Earl Clark, of Vulcan, by the Vulcan Elks. The local Elks will be quite interested as it was Mr. Clark who came to the rescue of Organizer McKinley, when the Calgary officers were compelled through their survival, to default helping with the installation of the local band.

The local golf course is in fine condition, and anyone wishing to participate in the match next Friday are requested to notify on or before Friday the Captain, Jos. B. Van Tighem, or the Vice-captain, Billy Gray.

Mrs. Roberts, who has been the guest of her daughter, Mrs. G. H. Patrick, left yesterday for Vancouver, B.C.

Born, to Mr. and Mrs. R. O. Larsen, of Cranston at Mrs. McKenzie's Hospital, on September 15th, a daughter.

Arnold Francis, the new proprietor of the Strathmore Hotel, has made arrangements to have complete returns by radio of the Honey-Denney fight on Thursday night, to hear which, everyone is cordially invited.

The many friends of Mr. and Mrs. A. Ring will be sorry to learn Mr. Ring is ill, and has been confined to bed for several days. It is hoped a turn for the better will take place, with a speedy recovery soon.

Mrs. T. Gatenby went to Calgary Tuesday, to hear the world famous Sousa's Band.

Mrs. Brown and Miss Vanderhook entertained at a small, but very enjoyable, "wild game" dinner Saturday evening.

Mrs. T. Chamberlain has gone out to their farm home for a few days.

Mrs. Garrett and her sister, Mrs. McKay, spent an enjoyable holiday at Vancouver.

Rev. H. D. Marr, of the Canadian Bible Society, will give an address in the United Church next Sunday evening.

The Ladies Aid of the United Church will meet Thursday, September 22, at the home of Mrs. T. Gatenby.

Friends of Dr. E. G. Stumme will regret to learn that he has decided to leave Strathmore and locate at Glenora. Surely what is Strathmore's loss is Glenora's gain.

Quite a number of charmingly important little teas have been arranged, having Mrs. Patrick's mother, Mrs. Roberts, as honor guest. One of the most delightful of these was that given by Mrs. T. E. Wright last Wednesday. The guests included: Mrs. Roberts, Mrs. Patrick, Mrs. T. Chamberlain, Mrs. J. Van Tighem, Mrs. Sinden, Miss Kelly, and Mrs. A. A. Moore. Other hostesses have been Mrs. Ridley, Mrs. Sinden, Mrs. Chamberlain, and Mrs. Moore.

Friends of Mr. and Mrs. Cecil Edwards, formerly residents of the district, but now of Portland, Oregon, are sending their congratulations upon the birth of a son on September 16th.

Mr. W. H. Mitchell, of Calgary, spent the week and guests of Mr. A. A. Moore. Mr. Mitchell was one of the engineers engaged in the construction of the C.P.R. Irrigation canal in 1908-09 in the district from Strathmore to Cranston. Mr. Mitchell was much interested in comparing the Strathmore of those days with the present, and the odds were all in favor of the present. She was also delighted with the beautiful arrangement of trees, gardens etc. at the I. D.

The Syod, of the County of England in Canada, met in Kingston, Ontario last week.

Mr. Leonard Van Tighem returned to school last Wednesday.

NASH

Leads the World in Motor Car Value

While other manufacturers have been working part time, or have, in some instances, practically closed down their factories, NASH has been working at full capacity.

The month of August was the biggest month in the history of NASH.

Look at the New NASH—Ride in it—Compare it with other cars. I know you will come to the same decision that I did.

ROCKYFORD

Dr. H. D. Hewson was called to live
over, owing to the serious illness of
his mother.

Miss Strong, of Strathmore, spent
the week end with Mr. and Mrs.
Walrod.

Born to Mr. and Mrs. S. W. Bentley,
a daughter, Dr. Hewson attending.

Mr. and Mrs. Lingenfelder spent a
few days in the city last week.

Mrs. Griffiths and daughter, Mary,
returned home on Saturday, after a
two months holiday.

Harvest operations are in full swing
again after the recent rain.

The first Canadian Club luncheon
was held at the Rockyford Hotel on
Saturday last. Over thirty members
were present. Rev. Father Killen
gave a very interesting talk on
"Patriotism" as it applies to the indi-
vidual. The meeting decided to hold
another luncheon on October 15.

NAMAKA

A special "Rally Day" service will
be held next Sunday, September 25th,
at 11 o'clock. Rev. H. D. Marr, B.A.,
District Secretary of the Canadian
Society, will give an address in
the interests of the work of the Society.
Special music. Everybody welcome.
Make this a big Rally.

Mr. Geoffrey Wooster has arrived
from London, England, at the home of
his uncle, Mr. H. R. Wooster.

The many friends of Miss McKenzie
will regret to learn that she is con-
fined to the Hospital in Calgary,
suffering from a heavy cold. We wish
her a speedy recovery.

Mr. Hoover, the relieving C.P.R.
agent last Monday for Hodelin, and Mr.
Lay, of Chumy, has come to take the
duties of station agent.

Business is picking up in the lumber
yards. The Revistock manager had a
car of lumber shipped in last week.

Mr. and Mrs. Murray and family, of
Three Hills, were the guests of Mr.
and Mrs. J. W. McIntosh over Sunday
and Monday.

Mr. and Mrs. Fred Watts, of Chau-
pion, visited at the home of Mr.
Watts' mother the week end.

THE LABEL

On your paper indicates the
"life" on which your subscrip-
tion expires. IF YOU are in
error, we would appreciate an
immediate settlement.

CARLELAND

Horbert Gardner delivered the first
load of 1927 grain to the National
Elevator. Mr. McGuire says this load
of oats will grade 2 C.W., weighing
forty-two pounds to the bushel.

R. S. Harkness is confined to bed
from the effects of a cold.

South of the river is pretty well ad-
vanced on the wining up of cutting.
Some extra heavy crops are in the
stack.

Last Tuesday, when harvest opera-
tions were at a standstill, several of
the local boys took the advantage of
staging a birthday party.

Mr. and Mrs. Graham Forbes and
Ed. Nelson made the trip to Calgary
Tuesday during the bad weather. For
further details of the trip, Ed. will
remind them.

Albert Harper and companion
were the early birds on the opening
morning of Duck Season, returning at
night with a good bag of mallards.

The district around Carleland must
be in a prosperous condition from the
many farmers who are purchasing new
threshing machines this fall.

In the next two weeks a lot will be
pulled off between Geo. Mace and Ed.
McIntosh in the possibility of a team
pulling into any of the elevators with
50 bushels of wheat with wheels lock-
ed.

RESULTS OF JUNE EXAMS.

CARLELAND HIGH SCHOOL

Pupils with number of grade, who
passed in eight subjects:

Zella Giles, IX; Marion Gibson, IX;
Virginia Philand, IX.

Passed in seven subjects:

Earl Bergquist, IX; Jack Kenneth,
IX; Fred Powell, IX.

Who passed in six subjects:

Elizabeth Deines, XI; Margaret
Ostrom, XI.

Who passed in five subjects:

Elmer Field, X; Robert Moore, X;
Helen Janderson, X.

Who passed in four subjects:

Mable Powell.

Who passed in three subjects:

Leona Christensen, Palmer Christen-
sen.

Who passed in two subjects:

Grace Jamieson.

The total of fifteen pupils passed in
10% of subjects written.

The eleven pupils who passed in
five subjects or more passed in 86% of
subjects written.

Fred Powell and Marion Gibson
passed in Latin I; Zella Giles in Latin
I, and French I.

Marion Gibson and Virgil Fisked,
Grade IX, passed in Grade X, composition
also.

All pupils took either Art I or Art 2,
and all passed out one.

Those taking Algebra 2, History 1,
and History 2, this year will be glad
to hear that these courses have been
considerably shortened, the old course
having been proved too difficult.

Following are the names of the
eleven pupils from a class of twelve,
who passed the Grade VIII examina-
tion: Bertha Giles, Alex Woodrow,
Hiram Melendy, Erlene Cole, Grace
Ostrom, Dick Bishop, Melva Cole,
Linda Cole, Francis Jamieson, Tony
Janderson, Virginia Gordiner.

The symptoms of the first stage are
those of any general infection. Head-
ache, fever, general out-of-sorts feel-
ing, and usually in addition some dis-
turbance of the digestive system, loss
of appetite, vomiting, diarrhoea.

Sore throat is usually present and
sometimes less frequently coughing
and sneezing.

The second stage shows very rapidly
the development of paralysis, one leg
and an opposite arm, or other uncer-
metrical loss of muscular power. This
is preceded by some physical signs
that a physician may ascertain on ex-
amination, but the symptoms them-
selves are not marked, twitches,
stiffness of the neck and back, head-
ache, general tenderness.

SCHOOL COLUMN

Last Saturday there was held in

Calgary, at the residence of Inspector

Lucan, a meeting of the Executive of

the Calgary Rural Teachers' Assoc.

The Strathmore meeting was repre-
sented by Miss Calder, Calraith

Mr. Watson and Mr. Crowther.

The purpose of the meeting was to
make arrangements for the holding

of the Fall Convention of the
teachers of this jurisdiction. The

convention will be held in Calgary on
the 2nd and 4th of November. A pro-
gram was drawn up which should con-
tain much of interest and value, and

it is hoped that every teacher of the
district will find it possible to attend
all the sessions on these two days.

An opportunity will be given during
the convention to observe lessons
taught in one or more of the city class
rooms.

Alvis Scherer, who attended the
Crowfoot school last year, and is now
at the high school here, has just had
word from the Department of Educa-
tion that he has been granted his ap-
pel in Geometry 1 and has therefore
been given credit in that unit.

In the School Fair Prize List, the
name of Mr. Wm. Hinton was omitted
from the list of donors.

INFANTILE PARALYSIS

Acute poliomyelitis, commonly called
infantile paralysis, is an infectious
disease. The common name is a mis-
nomer, as the disease can and does
affect adults as well as children, as
severely, but much less frequently.

It is transmitted almost entirely by
the secretions of the nose and throat,
and is conveyed by contact, by con-
taminated articles, and by flies.

The disease shows itself in three
infected in two stages: first, a pre-
paralytic stage lasting, it may be, only
a few hours to two or three days. Then
the second stage, occurring after an
interval of a few hours to eight days
of apparently good health, has the
marked paralytic symptoms so well
known. Possibly 70% to 85% of the
cases infected show only the first
stage, but all these cases can trans-
mit the infection with all the viru-
lence of the most severe cases, and
have been, undoubtedly, responsible
for much of the spread of the disease
in past epidemics, since they passed
undetected.

The symptoms of the first stage are
those of any general infection. Head-
ache, fever, general out-of-sorts feel-
ing, and usually in addition some dis-
turbance of the digestive system, loss
of appetite, vomiting, diarrhoea.

Sore throat is usually present and
sometimes less frequently coughing
and sneezing.

The second stage shows very rapidly
the development of paralysis, one leg
and an opposite arm, or other uncer-
metrical loss of muscular power. This
is preceded by some physical signs
that a physician may ascertain on ex-
amination, but the symptoms them-
selves are not marked, twitches,
stiffness of the neck and back, head-
ache, general tenderness.

NATIONAL TENDENCIES ARE GROWING STRONGER

(Continued from Front Page)

the socialist standards of life of the
industrial nations. With the world
growing smaller every day through
modern transportation and communi-
cation, there will be a conflict between
the black and white races, and also
through the industrialization of India
and China, and there will be a conflict
between the products of this cheap
labor and that of the white races, he
said. He is much interested in the
effect of this new development on
Canada and will make a study of it
during his stay in the Dominion.

The Chinese Question

Regarding China, Dr. Guest believes
that the real Chinese question will
be settled between Japan and Russia.

The big question in the Orient is, how
long will highly organized and pow-
erful Japan, with her surplus population,
consent to be excluded from the Uni-
ted States, Canada and Australia? For-
tunately he continued, Japan's natural
field for expansion is China, so that
the real trouble will be between Japan
and Russia, for the Bolshevik govern-
ment is extending the historic policy
of Russia in attempting to secure an
outlet through China.

China, he said, is not changed in
spirit of Moscow and the present
spirit of unrest. Underneath China
is the same as ever and the Chinese
people will not be lulled for a
long time. China and Japan are
bound either to agree or disagree, and
so far as Britain is concerned, the
whole thing is a matter of prestige.

As for the possibility of China be-
coming modern, Dr. Guest thought
there was no danger of either in
China taking on the customs of the
western world.

Getting back to the Empire, Dr.
Guest discussed at length on the
Empire Marketing board, which he
considers the most remarkable or-
ganization of the new world. It was
formed, following the imperial rela-
tions conference, and serves the
whole Empire. It handles jobs of
research and the new world. It was
formed, following the imperial rela-
tions conference, and serves the
whole Empire. It handles jobs of
research and the new world. It was
formed, following the imperial rela-
tions conference, and serves the
whole Empire. It handles jobs of
research and the new world.

It was generally known that indi-
viduals and firms would be added with
expert information on every angle of
marketing in the world.

Praises Immigration Officials

Dr. Guest highly praised the general
efficiency of the immigration officials
of Canada and their courteous treat-
ment of the new arrivals. He was
of the opinion that the officials were
studying the type of persons coming
to Canada to settle. Dr. Guest crossed
the steamer of the Metagama with
immigrants from Ireland, Wales, Scot-
land and England. He was much im-
pressed with the manner in which
these people looked after the new com-
ers and also with the fine pioneer spirit
exhibited by the immigrants. They
seemed filled with a sturdy spirit of
optimism, and were ready and willing
to greet whatever hardships they
might encounter in the new world with
courage and intelligence.

"THE STORE OF QUALITY AND SERVICE"

M. A. RELLINGER, PHONE 54

HEARD ON THE STREET

First Driver: "I met my wife in a peculiar way—ran over her with my car, and later married her."

Second Driver: "If everybody had to do that, there wouldn't be so much reckless driving."

"I took a gutter more than nineteen centuries to win a place in the sun," remarks Marshall Kingston.

"My, your little brother is growing big!"

"Yes, ma'am; he comes to the hens on mama's skirt now."

"When did the robbery occur," the cross-examining lawyer asked the witness.

"I think—" he began.

"We don't care what you think—we want to know what you know," remarked the lawyer.

"Well, I may as well get off the stand, then," said the witness. I can't talk without thinking. I'm not a lawyer."

The latest ballad is called: "Don't Worry About the Wood, Mother; Father Will Bring Home a Load."

Jim Means wanting a Burdock to cross the fish with the mosquito so that he can get a bite every minute.

Alfred: "Did you say that your friend married a man to reform him?"

Aggie: "Nothing so old-fashioned. I told she married a reformer to make a man of him."

Jim Simmons had been reading that science has invented an earthquake annunciator that goes off like an alarm clock. "Now," said Jim, "if science will only invent an alarm clock that goes off like an earthquake it will be more to the point."

Ernie Whitehead says: "Ministers are not usually good self-propagators. Someone they never can manage the proper, self language in addressing the ball. Of course," he said, "there are exceptions."

Tony Grosz says his idea of a fellow out of luck, is when an unemployed driver with a quart of sin and one arm around a girl, drives a stolen car with no lights and no music, but plates on a one-way street and after running past a red signal and two cops, crashes into a patrol wagon.

John C. Davis, of Ardenburg, used to make a number of trips to Stettler (he doesn't go so often now) and had to pass through the bad lands district, and he often thought that the Nature must of had a pain to spoil a lot of good farm land by piling up a heap of sand and gravel, salt and soda, so that even cactuses can't grow. That country is so bad, alas, it doesn't raise a spear of grass; there ain't a ribbit; or a snake, it gives a man a stomachache to see a place so sad and bare, there wasn't a thing ago-ward there. That place ain't made of loam ground, there's hills and gullies all around that kind of salt or alkali, they're stony out a good supply.

"A nickel for your thoughts, Pete," said Jean.

"Well," said Pete Telford, with due boldness, "I was thinking I'd like to kiss ya, lassie."

Jean blushed but made no objection, and after the kiss they lapsed into silence. Presently Jean said, "And what are ye thinkin' about now, Pete. Another kiss?"

"No, lassie, it's mair serious, this time. I was just wonderin' when ye're goin' to pay me that nickel for my thoughts."

Phyllis: "I'll give Reginald credit for getting her a nice engagement ring."

Dora: "I understand that's what the jeweler did too."

Puckenhart: "What's Jim Moran swearing about?"

Alex Gray: "He'd just settled down to a quiet afternoon's fishing, when a fish took his hook."

"Well —"

"—and woke him up."

Did you girls find the cooking and washing up very tiresome?"

"Oh no, we took mother along to cook. She needed a vacation."

"Doc, your operation will leave a scar, won't it?"

"Yes, that can't be helped."

"Good, I don't want to be opened in the same place twice."

Bill Wilkinson: "Hurrah! I'm going to have a holiday tomorrow!"

Wife: "Good! You can clean the cellar and the attic."

Car Owner: "I've driven this car six years and never had a wreck."

Jim Swanson: "You mean you've driven that wreck six years and never had a car?"

A Scotchman and an Englishman were travelling to London by train from Glasgow. The Scotchman sat glumly in his corner without speaking a word.

After an hour or two the Englishman tried to start a conversation.

"It's a long and interesting journey, isn't it?" he said audibly.

"So it ought to be for the money," growled the Scotchman.

Harry's advice to Jim Weir: "If you don't feel just right, if you mean and sigh, if your throat is dry, if your heart doesn't beat, if you've got cold feet, if your head's in a whirl, For heaven's sake, MARRY THE GIRL."

The farmer was scolding the hired man for carrying a lighted lantern to call on his best girl.

"The idea," he exclaimed, "When I was courting I never carried no lantern. I went in the dark."

"Yes," said the hired man sadly, "and look what you got."

Harold Smith went calling upon one of the Coronation belles. The old man kept a very vicious householder that he was not wanted at night. When the canine had finished with Smithy the rear of the latter's trousers was missing. The boys, joshing him about his predicament, asked if the girl was worth risking his anatomy in that fashion.

Smithy replied: "Maybe not, but I have always been willing to give up my seat to any lady."

"Do you mean to say that preparation will remove my beard if I just pour it on my face?"

"Absolutely," the other day the boss pulled some on the rag and the next morning when we came in we found we had blueham. said Wilfred Card."

It was a dear old Calgary lady's first ride in a taxi, and she watched with growing alarm the driver continually putting his hand outside the car as a signal to the following traffic.

"Harold," she said, "on look after that car of yours, and watch where you are going. I'll tell you when I start raining."

"How did you screw up your courage to propose to the rich Mrs. MacTavish," asked Pete Telford.

"Look, mon, 'twas awful! I'd sworn I'd do it come Monday night, and I took her for a ride in a taxicab, and wif' one eye on the meter ticked away, 'I had her won at the end of six bits."

"I'm sorry, but I can't cure your husband's talking in his sleep," said the doctor.

Wife: "Can't you give him something to make him talk more distinctly, that's of more importance to me?"

A bargain for some crusty old bachelors of Strathmore: \$300 buys 15 acres, here, young cow just fresh, heifer, 75 chickens, are garden and potatoes, bearing orchard, farm and garden tools, 5-room house all furnished, barn and hen house, wife in hospital, \$300 takes all.

POSTMASTERS' PAY UNDER DISCUSSION

Revision of the salaries of rural postmasters is under advisement by the Post Office Department.

There has long been complaint as to the scale of remuneration of these employees. It is based on a percentage of their sales of stamps, etc. The reduction in postage would have operated toward an automatic reduction of the pay of the postmaster but as a temporary measure steps were taken to see that no one lost more than he or she received before.

What is now under consideration is a permanent adjustment of the scale having regard to the effect upon it of the reduced price of stamps. In this connection consideration will be given for increased remuneration.

MORE FLOWERS AROUND CITY AND COUNTRY HOME

A floral parade of thirty or more large flats at the Canadian National Exhibition bore testimony to the increasing interest in flowers and the ornamental planting of home grounds. That these displays were prepared mostly by nursery men and florists

does not minimize the fact that the love of flowers is finding expression among home builders. On the outskirts of the cities in the towns and villages and around farm homes there are springing many beautiful gardens that are the pride of the owners and the delight of all who pass by. Horticultural societies have sprung up by the hundreds offering to the members the opportunity of competing in annual shows, or purchasing plants at reduced rates and sharing experiences at the monthly meetings. All these things take a little extra time and labor, also a little patience to wait a year or two for full results with shrubs and perennials. Who will say that it is not worth while to grapple this season of the beautiful? If the flowers help to form an attachment to the old home and check the drift of the hand pavements and glaring lights of the cities they are worth the few extra hours spent on them.

This advertisement is not inserted by the Alberta Liquor Control Board nor by the Government of the Province of Alberta.

INCREASED PRODUCTION SHEEP AND WOOL

MONTREAL—Developments of the present year go to confirm the conviction previously expressed that Canada has entered upon a new era of sheep breeding and wool production and efforts are unrelenting to accelerate the rate of progress. Notice is periodically received of new ranges being established in Western Canada while the value of the sheep on small farms is being more generally appreciated and a small herd is increasingly becoming an additional phase of mixed farming activity. The sheep population in Canada would appear to

be definitely on the rise. The scope for the industry is enormous, and the sheep have a long way to go before coming into its own in Canadian economic life. While at the end of 1916 there were 3,951,335 mutton ewes, 5,268,815 other cattle, and 4,470,771 swine in the Dominion, there were only 3,035,567 sheep. While Canadians consume 75.45 pounds of beef per capita per annum and 77.44 pounds of pork, the average annual consumption of mutton is insignificant and 85 per cent. of slaughterings are consumed at home. Exports of mutton from Canada represent about 1.5 per cent. of total beef and lamb and 1 per cent. of total value of beef.

WESTERN PRODUCTION**

Hon. Dr. King and party, who recently visited the Northern portion of Alberta, while en route to Regina, Treble, the champion wheat grower, and they were amazed to find that the champion has been resting upon the laurels, and hence that he has developed a new wheat, which will surpass the wheat buyers of the world. He anticipates that the new wheat will ripen eighteen days earlier than any variety that has so far been produced. If successful, this new variety will almost revolutionize wheat production in Western Canada.

**WHAT ABOUT
PAVING THE
PUBLIC STREETS?**

The Minnesota Highway Department is an experienced organization in road operating, and their opinion may well be considered by our own Minister of Public Works, and the Mayor and Councilors.

It is estimated that if all the trunk highways of Minnesota were paved, a maintenance allotment of \$200,000 would be more than sufficient. Main chance of gravel roads (such as Al. B. 10) goes in for a mile per year to more than \$200 a mile, as against an average of only \$250 a mile for maintenance of gravel highways. Paving the entire system would therefore save three millions a year, a sum that would finance both interest and sinking fund requirements on between \$20,000,000 and \$25,000,000 in 20-year paving bonds.

The Minneapolis Journal says that translated into dollars and cents in the driver's pockets, the difference between a gravel road and a paved one averages three cents a mile. It estimates that the average Minnesota car is driven 2500 miles a year on trunk highways, with a paved mileage of 500 and an unpaved mileage of 2000. This works out to a total of more than \$25,000,000 a year in the difference between present operating and depreciation costs and the low costs that might be possible with every mile of the system carrying a concrete surface.

The Journal observes: "We do not know for the department's future, though we have every reason to believe them accurate."
Would it not be a paying investment to pave the streets, instead of spending such large hundreds of dollars, which the next season's wet weather persists in almost destroying?

This is well worth investigating to ascertain if it would be possible to finance such a proposition.

Surely, if it is possible to pave highways, it must be within the realm of possibility for a town to do so.
Make Strathmore a real Home Town.**STRATHMORE, TO GROW
REQUIRES SOME
NEW INDUSTRIES**

The Standard wanted a short time ago to the need of some industries in Strathmore. It was not only a good thing to be provided for the boys, and that they might be taught trades that would fit them to obtain wages that would be satisfactory to them and keep them at home.

At present Strathmore is spending only fifty per cent. of its municipal taxes upon the public schools, and as soon as the lad has finished his school work, he is forced to leave and get employment in some other town, and help build it up.

Strathmore has had the expense of giving him his education, and the other towns or city secure the benefit without having spent one cent upon giving him that education.

This condition must continue until such time as a development takes place here that will keep the boys at home.

**REDLIFE IS VERY LITTLE LARGER
THAN STRATHMORE, AND THE REDLIFE REVIEW
IS SPEAKING ABOUT BUSINESS CONDITIONS**

Some idea of the amount of business at our industries in Redlife may be gained by noticing the number of trucks loaded with produce, shipped out of here at every aisle of the week.

Last Friday morning the freight lifted thirty cars of goods hauled here, from the several industries now in operation. As the freight cars have been three times a week for thirty cars are the result of only two days loading.

While the shipment last Friday was slightly above the average, we understand that from 60 to 75 cars are shipped of an average every week.

Besides this sale of raw material is constantly coming in.
The merchants and business men are heavily taxed for municipal purposes, and as conditions are no possible chance of looking forward to a reasonable business growth to recommend them. Why, if D. A. Perry had shrimps like this with the possibilities, he would hardly speak to President Beatty, and the merchants would be doing much more business, with little more overhead expense than they have now to carry.**GREAT DEVELOPMENT
IN PEACE RIVER**

The Peace River country, in fact the whole northern Alberta, is gradually coming into its own, and during the next few years, an immense development is quite within the possibilities. In fact, it is very probable.

The Winnipeg Free Press writes to that country as follows:
"What is happening in the Peace River country is typical of the trend of events right across the Canadian continent. So quick yet so silent has been the change in the wide area of Northern Canada that it is little wonder that it is difficult for the Canadian people to realize what has taken place. Thousands of settlers are to-day making their living and preparing fine farm homes for themselves in the great dry belt left over for settlement along the National Transcontinental line that runs from Winnipeg to Quebec by the northern route. Twenty years ago the land lay desolate. Ten years from now it will rank as one of the well established agricultural areas of Canada. Pulp mills are providing employment for hundreds of men and a market for the wood products of the settlers. New towns are well built and substantial. The second largest city in the world is turning out its wealth every day in the two years in the centre of a country some 500 miles from the ocean described as an area of no value—the land of the stunted poplar." The silver and nickel mines are coming into the picture in the west. Every year new mines are coming into operation. Every year Canada produces more and more in search of new mines, but gold, silver, and water power to be harnessed to turn the wheels of industry far south. If Canadians are sometimes told about these northern ventures, the American capitalist is not. He is on hand with his money all across the Canadian northland, and he is no fool with his money. If he were he might not have so much of it; he is fastidious in regard to natural resources and showed in business.**HON. MR. ROBERTS' VIEW**

People generally, quite without regard to politics, will read with interest and appreciation the announcement of Hon. Robert Rogers in respect of the likely attitude to be taken by the federal government in connection with the construction of a trans-Canada railway. Speaking on the subject in Montreal, the discussion having been presided

As it happens, by the editorial reply of The Montreal Gazette to the letter published in its columns from W. R. Givens, the President of The White Standard—Mr. Rogers, in agreement with this letter, said: "I have always thought and think more than ever, that a discussion as to Western Canada or Eastern Canada, is a great mistake. We are all Canadians, heirs and joint heirs in a great inheritance and the time is coming. If we are going to succeed in building up Canada as we should, when people must approach every subject from a national point of view, whether it is in the west of Canada or in the east."

This is such plain common sense, such sound patriotism—and applicable to all political parties—that it seems to us it needs only to be started to be accepted without the necessity of arguing or stressing the point. What Canada needs today more than ever is not a National Policy but a National Spirit, and this latter she certainly never will have so long as sectionalism and provincialism run rampant—so long, too, as our politicians cling before those who advance their sectional appeals. This is not a country of provincial units but a country and no political party can hope for long so would it deserve, to hold the confidence of the people of that Dominion unless it shall evolve a policy suited to the needs of Canada and her people as a whole, rather than to particular sections or groups.
—Kingston Whips Standard**SHUTTING OFF
ALBERTA COAL**

The placing of Alberta coal on the Ontario market appears to be shut off completely by the majority finding of the Railway Commission that the actual cost of taking a ton of Alberta coal to Ontario is \$12.2 a ton. When the cost of overhead expenses is added to this it brings the figure up to \$19.67 a ton. This is still leaving the railway without any profit. If the railway is to have a profit, no doubt, the board considers that the railway tariff per ton would have to be \$12.25.

This is the opinion of Chief Commissioner McKinnon and Assistant Commissioner McKinnon, who stated the majority report. Commissioner Oliver presented a minority opinion placing the actual cost of policies cost at \$6.25 a ton or about 75 cents lower than the majority finding. Mr. Oliver was not prepared to say what the rate should be if the railway were to have something for overhead expenses and profit. Some information about the railways and by those who are used for the Alberta and Ontario governments who are anxious to see Alberta coal on the Ontario market, and not enable him to make a comparison.

It has been plain all along that the rate at which Alberta coal is carried to the Ontario market will be under \$8. Mr. Rogers said now to have any chance of competing with American coal sent to Ontario. "The coal (that) is now being sent to Ontario is not a pleasure in a newspaper to read a reality that the above has shown that advertising in the local newspaper is common more and more and the own and the real value is realized."
—Winnipeg Free Press

to compete with American hard coal, which makes it plain that the freight rate must not be more than 47 to permit business to be carried on.

The outcome of the investigation by the board will bring satisfaction to no one. The railways, apparently, have demonstrated to us that they carry Alberta coal to the East at \$1 or \$1.80 rate. About the only course left open is for Alberta and Ontario to make new evidence to prove that the railways are mistaken.

—Winnipeg Free Press

**MISPLACED
IMMIGRANTS**

The Toronto Globe writes a timely and very pertinent editorial upon the fact that some three hundred men brought out from the United States to take places on Western farms shipped themselves from the West of Toronto, jobs, almost at a time when special trains were taking West men by the thousands to help harvest the prairie crops. Commenting upon this fact the Globe says that something certainly is wrong when such a thing can happen and declares that it would appear that "either these men do not know the facts or they are misled by those they left home or they failed to live up to their undertaking when they reached the Canadian West." Apparently the facts now to hand, the last explanation is the correct one, namely, that these men really declined to accept farm work, when they got to the West so that naturally their present predicament is due to their own fault.

Nevertheless when this is so it does not excuse those agencies who have taken them come here, for it was up to them to make reasonably certain that these immigrants when they arrive in Canada would in fact be satisfied with farm work and would be prepared to accept it in the proper spirit. Quite clearly no such assurance was given and hence it is that the men are now jobless; hence also, we have no doubt, that they will write to their friends and relatives of home complaining of conditions here and of the treatment they have received. The sooner that the immigration is stopped and only those immigrants who want to go on to the farms who are willing to turn the better for all concerned.

THEY ARE GETTING WISE"Discussed re grant to Strathmore-Killam Fair. It was moved by Rogers that the Strathmore-Killam Fair be held until a satisfactory explanation is given as to why the Fair was not held in the Strathmore-Killam Fair district, which is sent to every farmer in the municipal district, as this committee is the committee that every farmer in this district is entitled to know in this district is entitled to know in this district is entitled to know."
—Strathmore DispatchThis is part of the minutes of the annual meeting of the Strathmore Municipality No. 125, held August 4th, '27, and it is a pleasure in a newspaper to read a reality that the above has shown that advertising in the local newspaper is common more and more and the own and the real value is realized."

TENDERS FOR SCHOOL HOUSE
 Sealed Tenders will be received by
 the Board of Trustees of Kithrup
 Rural High School District No. 7, at
 the office of the Secretary-Treasurer
 up to noon, September 26th, 1927, for
 the erection of one roomed frame
 building after Plan Number "C 4".
 Plans and specifications may be ob-
 tained from Secretary-Treasurer on
 payment of a deposit of \$5.00. Plans
 must be returned within 24 hours, and
 deposit will then be refunded. A
 marked cheque for five per cent. of the
 amount of tender should be enclosed
 with each tender as a guarantee that
 same is bona fide. The lowest or any
 tender will not necessarily be accepted.

**INFANTILE PARALYSIS
 PRECAUTION ISSUED**

The Provincial Board of Health, in
 order to cope with the dangers from
 infantile Paralysis, have issued an
 order, requiring all children under
 years of age, to obtain a permit to
 change their residence from one mun-
 icipality to another. Consent must be
 obtained from the municipality to
 which removal is desired.
 These instructions were received by
 Mr. E. M. Wynn on Wednesday, and
 must be faithfully observed.
 The Department requests the co-
 operation of everyone in order that the
 threatened epidemic may be avoided.

**GAS TRAIN SERVICES
 EXPECTED BY BRANDON**
 BRANDON, Man.—It is officially
 stated here that the railroad compa-
 nies are contemplating the establish-
 ment of a gas train service to and
 from points in this district next spring.
 The intention is to run only passen-
 ger and light express traffic by this
 means. It does not appear that any
 definite programme has been worked
 out beyond the fact that the railway
 authorities are experimenting with
 such an end in view.

 FOR BOYS AND GIRLS**
 — 20 —
 Can you remember the
 Anniversary is 1-derful.
 Astronomy is 1-derful.
 The earth is 2-derful around the sun.
 And interesting 2-derful.
 The moon is dead and calm.
 By law of pig 6 great.
 If I 7 where the stars alive, do
 do nightly antics.

If watchful Providence be 9,
 With good in 1-derfuls freight,
 Did not keep up its grand design.
 We soon should see some 10.
 Astronomy is 1-derful.
 But it's 2-derful 4
 I mean 2-derful 4
 I'd better say no more.
 The Lion and the Unicorn
 Were fighting for the Crown.
 The Lion beat the Unicorn
 All round about the town.

Some gave them white bread.
 And some gave them brown;
 And some gave them plum cake,
 And sent them out of town.

POSERS
 What has no legs, yet is forever
 running?
 Why is Europe like a crying pan?
 Answers to these and last weeks in
 next week's paper.

SEPTEMBER
 Now we hail thee Queen September,
 Like a shadowy druid queen,
 Fades the Summer, Past its glory,
 Yet remains the varied story.
 Of the Autumn, In its haze,
 Flashes of color'd upland;
 And the daisy, child of Summer,
 Stays to read the staid new moon.
 Still to end its brief good cheer
 To the surely dying year.

In the forest, lately green,
 Autumn's handiwork is seen;
 For in orange, red and gold,
 Rarest beauties now unfold:
 And the street, but lately sparkling
 With the Summer show, now darkens,
 Chants the low, funeral song.
 As it slowly moves along.
 Chant of some birds grown more still
 In the orchard on the hill,
 Utter now a weird lament,
 That the Summer days are spent.

**CANCELS LICENSES
 OF MAD MOTORISTS**
 — 20 —
 TORONTO—According to An-
 toinette H. J. Brown, the campaign
 against crazy motorists in Toronto is
 producing results.

When a license is cancelled by the
 magistrate it stays cancelled for the
 period set. There is no using the
 same car by other members of the
 family during the intermediate period.
 "I have cancelled licenses for a
 month, for three months, for six
 months, for two years and some of
 them forever," said the magistrate in
 discussing the madman type of motorist.

"I find that this is the kind of peo-
 ple that counts," he said. "I have
 young men coming before me who
 have not money enough to buy gas or
 pay a small fine. The only thing that
 gets them in is to cancel their license."
 This hurts, it works."

Magistrate Brown estimated that
 during this year he has cancelled
 about 200 motor car licenses.

**ALBERTA RANGE
 SHEEP PRODUCE
 BIG WOOL YIELD**
 LONDON, Ont.—The Canadian Co-
 operative Wool Growers, says W. H. J.
 Tisdale, are going to handle about
 2,500,000 pounds of wool this year,
 which is about the usual amount
 graded and sold by this organization.
 Of this, a million and a quarter pounds
 have been received at the Western
 warehouse from the range territory of
 Southern Alberta and Saskatchewan,
 and another million from the farm
 stocks of the west.
